"It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this."COLMAN LEFT THE Fallows house shortly before midnight with Bernard. Lechat, and Celia. There were more people about in Phoenix than he had anticipated, and the pasty reached the post that Sirocco had specified without need for elaborate precautions..she knew Luki for what he was even before he popped out of her. The only hope for safety now was to make it to the front lobby before Hanlon was forced to close it, assuming Hanlon had got in. "Go first with four men,".Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?.Cliff Waiters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..The dog watches, head cocked, looking every bit as puzzled as it ought to be.."Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again."..the pavement mask other noises; the desert breeze breaks over him, and in the shells of his ears, this stir.Leilani had no clue to the meaning of her mother's words. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. Instead, they slow to a stop at a."And he shot you anyway?". "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?".Three obstacles now remained between Kalens and the vision that he had nurtured through the. years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borftein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. , With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that

the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia...Pernak shrugged. "Just let the system die naturally." The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn..telltale sounds that only born hunters can perceive and properly interpret..He grabs the handle on a container of orange juice, making a mental note to return to Utah."To whom do I have to justify anything? It has to be worth a try."."She could do a lot better than waste herself with those bums. She's the kind that prefers the easy road. . . for as long as it lasts, anyhow."."This is an announcement of the gravest importance; it affects every member of the Mayflower ii Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you..Colman was nonplussed. He shook his head as if to clear ? it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised.".Throughout the institution, the floors?gray vinyl speckled with peach and turquoise?were immaculate..Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..Simpson, Westley, Johnson-all of them. "That was where Sirocco said he was going."."Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. Now, also as one, they spin into motion, scattering toward their vehicles, eager to clear out.That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens,

who even now was reacting to Lechat as a threat and rallying his own followers to action?."The country's Founding Fathers would be so proud.".The dog had continued to be an instinctive conspirator, huddling quietly with his master, below the wind, I am birds in flight, I am the sun, I am the sea, I am me!" Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and.."
